Features

The Sunbird Flag offers the same high-quality materials as our best-selling Falcon Flag but in a teardrop shape and at a more economical price—perfect for bulk orders. Designed with adjustable pole connections, it provides versatile height options, available in four sizes: SM (7.5'), MD (9'), LG (12'), and XL (15').

Built for outdoor display, the Sunbird Flag can be secured in grass with a spike base or set up on hard surfaces like concrete using the X-base. We custom print your graphics on durable polyester mesh using a dye sublimation process. This technique ensures vibrant, long-lasting colors with a "bleed-through" effect for single-sided prints, while double-sided prints include a silver-gray blocker for optimal visibility on both sides.

Each flag is finished with black trim sewn along the pole side, creating a pocket for the pole insertion. Grommets at the base of the trim allow for secure attachment to the base using the included bungee cord.

Whether for promotions, events, or branding, the Sunbird Flag is a stylish, reliable, and cost-effective display solution.
